# PROSPECTS

*In Musica*

*Inside the technology*

## USE YOUR CELL PHONE

We from the government give discounts to people who want to buy cell phones. This way we can get connected and move our country closer to the others. The use of a cell phone is safe and comes in handy when you need to contact somebody.

## OWN THAT COMPUTER

You all know the computers you can use in the beloved and overpopulated internet cafes. Now you can get your own computers. This way your children can get a brighter future because the internet is full of information.

## GET YOUR TELEVISION

Tired of watching your favourite shows on the communal tele? I understand, Just like the cell phones, we now give a reduction on televisions. We will start a weekly news report on everything that is going on in the country. You can't miss out on that, can you?

## WE MOVE CLOSER TO THE NEW WAYS

*By Dieter Embrecht*

"The internet is cracking", said Lil Dicky in his newest song Earth. And we can only support that. There is a lot of information gathered by all the other countries. We can learn a lot, but remember to be critical. You can't believe everything you read. Also, there are a lot of scammers. We need to advise you to not give out crucial information about yourself! Be safe and enjoy.
